SBI-R00
CELLAR CART

The SBI-R00 is a unique and portable hop blending unit with tremendous advantages over conventional cellar carts when used for fermenter recirculation. The newly designed SBI-R00 blender allows small scale brewers the ability to chop hop pellets, improve hop yield and increase surface area, while simultaneously recirculating the fermenter. The process is completed using a 1.5HP motor and VFD which can be operated using 115V single phase power.

There has been tremendous market response to the ROLEC DH 45/90/250 Dry Hop systems utilizing the SBI-R10 and SBI-R20 blenders. The SBI-R00 makes it possible for small batch brewers to enjoy the same benefits realized with the DH 45/90/250 Dry Hop systems decreased tank time, improved flavor profile and increased shelf life.

Contact the Ampco Applied Products team today to discuss how the SBI-R00 can benefit your brewery.

SPECIFICATIONS

- 1.5 HP 3500 RPM Motor
- Available voltages - 115V, 190V, 208V, 230V, 380V, 460V, 575V
- Up to 40 GPM / 9 m^3/hr or 1.3 bbls/min recirculation rate
- Up to 50 ft head / 22 psi / 1.5 BAR
- NEMA 4X VFD
- Input cord available
- Stainless steel 2 wheel cart
- Can be used as cellar pump
